

Czech-Japanese workshop on quantum information, May 21-23, The University of Tokyo

The workshop aimed at broadening the existing collaboration and opening the possibility of new partnerships between Japanese and Czech experts on quantum information and technologies. From Czech side the participating institutions were the Czech Technical University in Prague, Palacky University in Olomouc, Technical University in Ostrava and the Institute of Scientific Instruments CAS. Japanese partners included the University of Tokyo, Tokyo Institute of Technology, Gakushuin University, RIKEN and University of Tsukuba. The workshop was attended by about 70 people; 29 talks and 30 posters were presented. The topics discussed covered quantum optics, quantum computing, quantum sensors and open quantum dynamics.
